

A major East Anglian company supplying, installing, servicing and maintaining heat pump, air conditioning and refrigeration equipment

Technical Sales Manager

The role requires a focused, organised approach to providing technical surveys and quotations for projects throughout East Anglia, making presentations to impress all levels of decision makers from existing to new customers. With a minimum of NVQ Level 3, knowledge of heating/cooling solutions in renewable energy would be an advantage.

Specific and product training will be provided.

CV with letter for Mr Dale,
